

The infographic features two showerheads at the top, one on the left and one on the right, both spraying water. The central focus is the large blue text '60%'. Below this, a text block explains the water savings. At the bottom, two rows of blue water bottles are shown. The left row, connected to the left showerhead, contains seven bottles, representing 18 liters. The right row, connected to the right showerhead, contains three bottles, representing 6 liters.

60%

d'économie d'eau potable avec un pommeau de douche économique, soit 6l consommés par minute contre 18l avec un pommeau standard.
